## Evening Brief

Date: Thursday July 5, 2018

### Weather Summary

**\*\*\* Isolated Lightning on Friday over central and eastern Utah... Spreading North and West with Increasing Lightning Coverage Saturday through early next Week \*\*\***

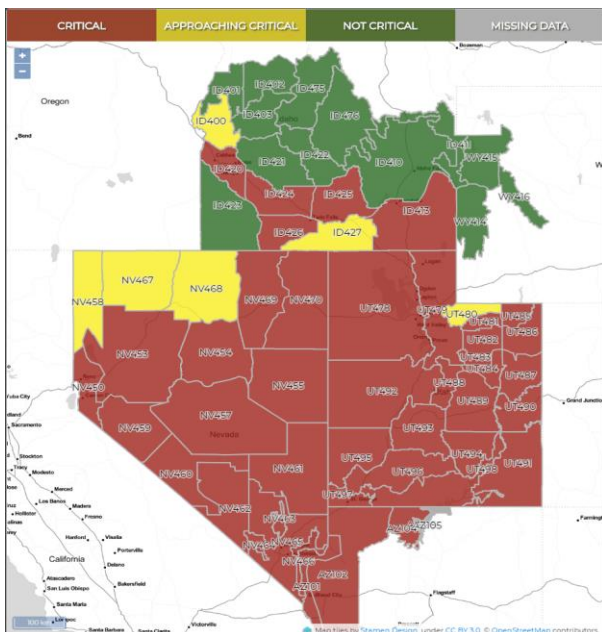

High pressure will continue to build west into the Great Basin as a low pressure trough remains off the west coast. Temperatures will average 10-12 degrees above normal later this week and this weekend.

Subtropical moisture will continue to move into Utah on Friday for isolated, generally dry high elevation thunderstorms. Thunderstorms will spread further west and north into far eastern NV and northern Utah Saturday and Sunday and begin to produce measurable precipitation by late Saturday into the first part of next week.
